- Loads estimated by NC Division of Water Quality. Equal to the sum of calendar-year monthly load values for each facility, which are based on minimum biweekly nutrient concentrations and daily mass flows.

[a] Cap values and changes result from the following:
1. Phase I – Original 12-member Association.
2. Phase II through 2000 – 14-member Association.
3. 2001 – Robersonville added, 15-member Association.
4. 2002 – Scotland Neck added, 16-member Association.
5. 2005 – National Spinning removed, 15-member Association in Phase III
