DID YOU KNOW?

On October 1, 2009 the State of North Carolina banned certain items from all NC landfills. This current ban includes all plastic bottles, oil filters, wooden pallets and oyster shells.

We all know oyster shells have never posed a problem for this part of the State but the other materials have.

Materials have been banned from the NC landfills starting as far back as 1991. These bans include such things as:

- Lead-Acid Batteries 1991
- Whole Scrap Tires 1991
- Used Motor Oil 1991
- Yard Waste 1993
- Antifreeze 1994
- Aluminum Cans 1994
- White Goods 1994
- ABC Beverage Containers 2008

Future Material Bans

All Electronics & Tube Style Televisions

2011

You are not required by law to recycle these materials. We do however strongly encourage everyone to participate in recycling in support of these material bans.
