Subject: Falls Lake Nutrient Management Strategy

Dear Hearing Officers:

I would like to submit my support for a quick and thorough clean up of Falls Lake. My family utilizes this lake for gatherings, recreation, and those lovely Carolina days that fill us with great memories. It's a real treasure to have such a wonderful natural environment so close by, and we don't want to see it continue to be destroyed.

1) Require clean up of the Lower portion of Falls Lake in seven years rather than 10; and

2) Put requirements in the place now for both the Lower and the Upper portion of the Lake to meet basic water quality standards, rather than waiting to require full clean up.

Sincerely,

Adrianna Beech

Dear Hearing Officers:

Good times and family memories are created on Falls Lake in our boat. I've had the joy of witnessing my 1-year-old daughter swim off our boat and play on the beaches. Beyond that, we love skiing and other water sports. Please do everything in your power to clean up the ENTIRE lake as soon as possible. I would hate to lose these great times because the lake becomes too polluted for me and my family to enjoy.

Thank you for presenting a strong clean-up plan to restore and protect Falls Lake-- an important source of drinking water for Wake County and recreation for the entire state. Clean-up of Falls Lake will take time, so it's important that measures to restore it begin as soon as possible.

I support the plan, and urge you to:

1) Require clean up of the Lower portion of Falls Lake in seven years rather than 10; and

2) Put requirements in place now for both the Lower and the Upper portion of the Lake to meet basic water quality standards, rather than waiting to require full clean up of all of the Lake.

Sincerely,

Heidi Giusto

My wife and I have started taking our one year old daughter out on our boat at Falls Lake this summer. We all enjoy swimming, and my wife and I enjoy various water sports which we look forward to sharing with our daughter and hopefully with our future children as well. We cannot do this without clean, safe water, and so we strongly support any efforts to improve and maintain the quality of the water at Falls Lake.

Sincerely,

Chris Giusto

Dear Hearing Officers:

Thank you for presenting a strong clean-up plan to restore and protect Falls Lake -- an important source of drinking water for Wake County and recreation for the entire state. Cleanup of Falls Lake will take time, so it's important that measures to restore it begin as soon as possible.

I support the plan, and urge you to:

1) Require clean up of the Lower portion of Falls Lake in seven years rather than 10; and

2) Put requirements in the place now for both the Lower and the Upper portion of the Lake to meet basic water quality standards, rather than waiting to require full clean up of all of the Lake.

Sincerely,

Diane Skrutskie

Dear Hearing Officers:

I remember Falls Lake when it wasn't yet a lake. On a hot summer day back in the mid-1970s, I took my nieces and nephews to play in the waters coursing over huge rocks not far from the farmhouse where they lived. What fun we all had!

Times and the lay of the land and waters have changed. Now, Falls Lake is in trouble.

Thank you for presenting a strong clean-up plan to restore and protect Falls Lake. The cleanup will take time, so it's important that measures to restore it begin as soon as possible.

I support the plan, and urge you to:

1) Require clean up of the Lower portion of Falls Lake in seven years rather than 10; and

2) Put requirements in the place now for both the Lower and the Upper portion of the Lake to meet basic water quality standards, rather than waiting to require full clean up of all of the Lake.

Subject: Falls Lake Nutrient Management Strategy

Dear Hearing Officers:

Thank you for presenting a strong clean-up plan to restore and protect Falls Lake -- an important source of drinking water for Wake County and recreation for the entire state. Cleanup of Falls Lake will take time, so it's important that measures to restore it begin as soon as possible.

I support the plan, and urge you to:

1) Require clean up of the Lower portion of Falls Lake in seven years rather than 10; and

2) Put requirements in the place now for both the Lower and the Upper portion of the Lake to meet basic water quality standards, rather than waiting to require full clean up of all of the Lake.

Sincerely,

Bruce Nawrocki

Dear Hearing Officers:

Thank you for presenting a strong clean-up plan to restore and protect Falls Lake -- an important source of drinking water for Wake County and recreation for the entire state. Cleanup of Falls Lake will take time, so it's important that measures to restore it begin as soon as possible.

I support the plan, and urge you to:

1) Require clean up of the Lower portion of Falls Lake in seven years rather than 10; and

2) Put requirements in the place now for both the Lower and the Upper portion of the Lake to meet basic water quality standards, rather than waiting to require full clean up of all of the Lake.

Sincerely,

David Bergum

Subject: Falls Lake Nutrient Management Strategy

Dear Hearing Officers:

Thank you for presenting a strong clean-up plan to restore and protect Falls Lake -- an important source of drinking water for Wake County and recreation for the entire state. Cleanup of Falls Lake will take time, so it's important that measures to restore it begin as soon as possible.

I support the plan, and urge you to:

1) Require clean up of the Lower portion of Falls Lake in seven years rather than 10; and

2) Put requirements in the place now for both the Lower and the Upper portion of the Lake to meet basic water quality standards, rather than waiting to require full clean up of all of the Lake.

Sincerely,

Anant Pradhan

Thank you for presenting a strong clean-up plan to restore and protect Falls Lake -- an important source of drinking water for Wake County and recreation for the entire state. Cleanup of Falls Lake will take time, so it's important that measures to restore it begin as soon as possible.

I support the plan, and urge you to:

1) Require clean up of the Lower portion of Falls Lake in seven years rather than 10; and

2) Put requirements in the place now for both the Lower and the Upper portion of the Lake to meet basic water quality standards, rather than waiting to require full clean up of all of the Lake.

Sincerely,

Thomas Patterson

Dear Hearing Officers:

Thank you for presenting a strong clean-up plan to restore and protect Falls Lake -- an important source of drinking water for Wake County and recreation for the entire state. Cleanup of Falls Lake will take time, so it's important that measures to restore it begin as soon as possible.

I support the plan, and urge you to:

1) Require clean up of the Lower portion of Falls Lake in seven years rather than 10; and

2) Put requirements in the place now for both the Lower and the Upper portion of the Lake to meet basic water quality standards, rather than waiting to require full clean up of all of the Lake.

Sincerely,

Ann Sherman

Dear Hearing Officers:

Thank you for presenting a strong clean-up plan to restore and protect Falls Lake -- an important source of drinking water for Wake County and recreation for the entire state. Cleanup of Falls Lake will take time, so it's important that measures to restore it begin as soon as possible.

I support the plan, and urge you to:

1) Require clean up of the Lower portion of Falls Lake in seven years rather than 10; and

2) Put requirements in place now for both the Lower and the Upper portion of the Lake to meet basic water quality standards, rather than waiting to require full clean up of all of the Lake.

Sincerely,

Russell Hindle

Dear Hearing Officers:

It is impossible to put a price on the value of a healthy environment. We humans have an ignoble history when it comes to environmental protection -- the basic attitude is "let's exploit the environment and ignore the damage until it becomes too expensive to overlook the consequences". Well, the costs of our past and current environmentally irresponsible behaviors are becoming more evident every day. As a voting citizen of North Carolina, I ask you to begin proactively working to restore the health of our beautiful North Carolina environment.

Thank you for presenting a strong clean-up plan to restore and protect Falls Lake -- an important source of drinking water for Wake County and recreation for the entire state. Cleanup of Falls Lake will take time, so it's important that measures to restore it begin as soon as possible.

I support the plan, and urge you to:

I support the plan, and urge you to:

Put requirements in the place now for both the Lower and the Upper portion of the Lake to meet basic water quality standards, rather than waiting to require full clean up of all of the Lake.

However, I also urge that cost of these measures must be shared by both residents of the entire Falls Lake watershed and the entire population of users of the water from the lake, and with additional funding by the state of North Carolina. Only if the costs of remediation are equitably shared is it possible to move ahead with this program.

Sincerely,

Howard Partner

Subject: Falls Lake Nutrient Management Strategy

Dear Hearing Officers:

Thank you for presenting a strong clean-up plan to restore and protect Falls Lake -- an important source of drinking water for Wake County and recreation for the entire state. Cleanup of Falls Lake will take time, so it's important that measures to restore it begin as soon as possible.

I support the plan, and urge you to:

1) Require clean up of the Lower portion of Falls Lake in seven years rather than 10; and

2) Put requirements in the place now for both the Lower and the Upper portion of the Lake to meet basic water quality standards, rather than waiting to require full clean up of all of the Lake.

Sincerely,

Kathryn Mazzuckelli

Dear Hearing Officers:

Thank you for presenting a strong clean-up plan to restore and protect Falls Lake -- an important source of drinking water for Wake County and recreation for the entire state. Cleanup of Falls Lake will take time, so it's important that measures to restore it begin as soon as possible.

Our family has lived in Raleigh for over 15 years and we plan to make this our lifelong home. We purchased a boat 5 years ago and spend many weekends boating, swimming, fishing and camping. It is disturbing and embarrassing to hear about the Beaver Dam and Sandling Beach closures each summer. We believe the runoff contributes to this issue.

Please move forward with your plan and:

1) Require clean up of the Lower portion of Falls Lake in seven years rather than 10; and

2) Put requirements in the place now for both the Lower and the Upper portion of the Lake to meet basic water quality standards, rather than waiting to require full clean up of all of the Lake.

Dear Hearing Officers:

Thank you for presenting a strong clean-up plan to restore and protect Falls Lake -- an important source of drinking water for Wake County and recreation for the entire state. Cleanup of Falls Lake will take time, so it's important that measures to restore it begin as soon as possible.

I support the plan, and urge you to:

1) Require clean up of the Lower portion of Falls Lake in seven years rather than 10; and

2) Put requirements in the place now for both the Lower and the Upper portion of the Lake to meet basic water quality standards, rather than waiting to require full clean up of all of the Lake.

Sincerely,

Grant Whiteheart

Dear Hearing Officers:

I want to thank you for presenting a comprehensive and strong clean-up plan to restore and protect Falls Lake. Although I do not live in Wake county I know that clean drinking water for that area benefits all of us. Since cleanup of Falls Lake requires time and may be resisted by polluters, it's important that measures to restore it begin as soon as possible.

I support the plan, and urge you to:

1) Require clean up of the Lower portion of Falls Lake in 7 years rather than 10; and

2) Establish requirements now for both the Lower and the Upper portion of the Lake to meet basic water quality standards, rather than waiting to require full clean up of all of the Lake.

Subject: Falls Lake Nutrient Management Strategy

Dear Hearing Officers:

Thank you for presenting a strong clean-up plan to restore and protect Falls Lake -- an important source of drinking water for Wake County and recreation for the entire state. Cleanup of Falls Lake will take time, so it's important that measures to restore it begin as soon as possible.

I support the plan, and urge you to:

1) Require clean up of the Lower portion of Falls Lake in seven years rather than 10; and

2) Put requirements in the place now for both the Lower and the Upper portion of the Lake to meet basic water quality standards, rather than waiting to require full clean up of all of the Lake.

Sincerely,

Susan Yarnell

I spent many enjoyable days at the lake in my teens,swimming and fishing,and having falls returned to a healthy state would be a responsible thing to do.

Sincerely,
