ADDENDUM 1: Questions and answers in regards to RFQ #286-01-2012

2012 Coastal Aerial Imagery Quality Control Surveys

This document summarizes the questions asked by potential contractors to RFQ #286-01-2012 and the answers given by the RFQ's technical administrator. This question and answer document serves as the State's formal response to these questions and will be part of the contract.

1. **Question:** What is the title for this RFQ? The RFQ's cover page has the RFQ's title as "2012 Coastal Aerial Imagery Quality Control", but the first page of the RFQ has "Aerial Imagery Quality Control Surveys" as the title.

   Response: The RFQ's writer apologizes for not catching this discrepancy. The first page of the RFQ should have had "2012 Coastal Aerial Imagery Quality Control" as the title.

2. **Question:** Is the $25,000 for all 25 counties, $1,000 per county?

   Response: The <u>total</u> project budget for the 2012 Aerial Imagery Quality Control Surveys project is $25,000, which is to cover the "Coastal" set of twenty-five (25) counties identified on the orthoimagery acquisition phase map (page 2 of the RFQ).

   The questioner's calculated figure of $1,000 per county would be the average amount of funds allotted to survey the QC points in each county not the preset amount per county, because *"NCGS will specify the scope of work in tile groupings and/or on an as-needed basis."* (page 3 of the RFQ).

3. **Question:** How many points are needed in each county?

   Response: NCGS will issue each selected firm (page 4 of the RFQ):
   - A set of QC points to survey
   - Aerial imagery that has each QC point plotted

   Each selected firm will be required to identify and survey a minimum of five (5) new QC points per county.

4. **Question:** How many firms will be selected?

   Response: NCGS will select a maximum of three (3) firms.

2012 Coastal Aerial Imagery Quality Control Surveys

5. **Question:** Are firms that are currently collecting data for the 2012 Coastal Orthoimagery project excluded from this RFQ?

   Response: Yes, any firm that has a conflict of interest with conducting the QC work on the 2012 Coastal Orthoimagery Project (e.g. collecting the aerial imagery for that project) would be ineligible to apply for this RFQ.

6. **Question:** The total project budget is stated to be $25,000. This amount seems unusually small in comparison to previous QC contracts. Is this the correct budget amount?

   Response: Yes, the $25,000 figure listed as the "Total Project Budget" on the cover page of this RFQ is the correct amount.

7. **Question:** May a firm that was selected for the County/State Boundary RFQ submit a proposal for the 2012 Coastal Aerial Imagery Quality Control RFQ?

   Response: Yes, any firm that was selected for the County/State Boundary RFQ (provided that they were not also selected for the 2012 Coastal Orthoimagery Project) may submit a proposal for the 2012 Coastal Aerial Imagery Quality Control RFQ, because there is no conflict of interest between the boundary project and this aerial imagery QC project.
