Subject: Comments on Falls Lake Rules

Mr. Huisman

Thanks for your efforts on behalf of the water-drinkers of Wake County. I am writing in support of the rules proposed to protect the water supply. Unlike the official spokes-people from my industry, I believe that Wake County residents, especially home owners, want to see this important resource protected aggressively. The Realtor and developer lobbyists who masquerade as "stakeholders" are out of touch with the rank-and-file dues paying members, who do not get consulted in any meaningful way by their leadership. Homeowners of course support high standards for clean water, and protection from the exorbitant costs that taxpayers will have to bear if we do not address this issues in responsible ways now.

I am concerned that the rules may be too lenient. I am concerned that the deadlines and targets will get re-negotiated as they draw closer. I want to make sure that stronger standards are adopted immediately regarding development in the water shed. I believe we need to move forward on clearing up the lake immediately because delay costs money and risks the health of water drinkers and recreational users. The Falls Lake plan will set standards for similar efforts regarding Jordan Lake and we must make clean-up of these lakes a high priority.
