City, State*:	apex, nc
Insert subject line:*:	Falls Lake Clean
Please personalize the comments below (or write your very own!)*:	I urge you to adopt rules that correct the pollution problem in Falls Lake as quickly and completely as possible. Protecting our fresh water resources is key to a sustainable, livable future in North Carolina especially as our population increases and further burdens our water resources. We must address Falls Lake problems now and protect for the future. Unmitigated, pollution will worsen and remediation costs will increase. Please adopt the Falls Lake Rules and ensure that clean of the entire lake occurs within a maximum of 25 years. In addition, I highly support the polluter-pays principle of environmental remediation in the adopted rules, and the emphasis on keeping stormwater on site by restoring natural hydrology. The EMC has a wonderful opportunity to protect the health and safety of North Carolinians by protecting and restoring this important resource. I urge you to adopt Falls Lake Rules that start now, finish soon, and do not allow efforts to stall along the way. Regards, Angel Turner

Please personalize the comments below (or write your very own!)*:	I encourage you to adopt rules that correct the pollution problem in Falls Lake quickly and thoroughly. Why delay? Why do it slowly? You would be asking for more expense later, so "git 'er done!" Please adopt the Falls Lake Rules and make the timeline SHORT. Furthermore, the polluters should PAY, and you should make this a long-term fix by not allowing stormwater to flow into the lake before it's been in holding ponds or through some filtration. The EMC has the authority to DO this, so why should you appease the people who profit from polluting a lake that belongs to the PUBLIC....the TAXPAYERS?! I urge you to adopt Falls Lake Rules starting immediately and finishing in my lifetime (better hurry; I'm 69 years old!).

Please personalize the comments below (or write your very own!)*:	I think Falls Lake is one of the most important assets we have in the Raleigh-Durham area. Clean water is a must for now and generations to come. I support adopting rules that correct the pollution problem in Falls Lake as quickly and completely as possible. Outdoor recreation is important to the health and well being of our community and many, including me, use Falls Lake for boating,swimming, fishing, biking, and hiking. I use Falls Lake for several of these and enjoy the lake parks for my family to play,picnic & camp. Please adopt rules that clean all of Falls Lake to improve the health and safety of this valuable recreation resource. Contact me if I can provide additional comments or answer questions.

Subject: Please Protect Water Quality in Wake County -- We need restoration of Falls Lake

Mr. Huisman, Representative Stam, and State Senator Stevens: I was shocked to learn about water quality problems in Falls Lake, which is a primary water source for Wake County. I have read how excessive nitrogen and phosphorus have brought the lake close to ecological collapse. I expect aggressive immediate action to be taken by all relevant government agencies to clean up the lake, maintain full compliance with water quality standards, and restore natural hydrology.

It is very difficult to understand how we collectively allowed water quality to deteriorate in the lake. Water quality, environmental protection, and wildlife protection must be top priorities.

Elizabeth Brunner

Please personalize the comments below (or write your very own!)*:	I support adopting rules that correct the pollution problem in Falls Lake as quickly and completely as possible because we have to protect the basic right of every North Carolina resident to have safe, fishable, and swimable waters--and to have waters in which they can recreate without endangering their health. People who enjoy fun and games on Falls Lake also boost the local economy there. If we wait to fix the problems plaguing Falls Lake, it will become more expensive monetarily for the state(with taxpayer money) and businesses contributing to Falls Lake's degredation to afford the cost of cleanup. Many citizens suffering from illnesses resulting from exposure to bacteria, chemicals from businesses, farms, roads, and private yard ru! noff may not have yet realized these dangers have contributed to their health problems; however, eventually I believe that they will. The cleanup task is too important to delay. People want to be able to enjoy the water and we all are a part of what happens in Falls Lake. The happenings there also travel down the River to other people and parts of the state. We are only as healthy as our rivers and our people. Please adopt the Falls Lake Rules and ensure that they clean up the entire lake within 25 years. In addition, I hope that adopted rules continue to wisely recognize the polluter-pays principle of environmental remediation, and provide greater emphasis on keeping stormwater on site by restoring natural hydrology. The EMC has a wonderful opportunity to protect the health and safety of North Carolinians by protecting and restoring this important resource. I urge you to adopt Falls Lake Rules that start now, finish soon, and do not allow efforts to stall along the ! way.

Insert subject line:*:	Water pollution & waste
Please personalize the comments below (or write your very own!)*:	It makes no sense for one county, Durham, to be allowed to pollute the Falls Lake simply because they don't use the water. In general it makes no sense for our state to allow anyone to pollute or deplete a resource like water simply because they don't care. This is especially valid when it is a resource that other depend on. The state needs to rapidly take control and provide enforcement of standards and practices for the disposal of sewage and the consumption of water. Residents of towns and cities should be paying the true cost of providing water and properly treating sewage. So long as these costs are kept artificially low there will continue to be wasteful usage and pollution instead of treatment.

Please personalize the comments below (or write your very own!)*:	We need to fix Falls Lake, and we need to do it now! We can't afford to let continuing pollution threaten one of North Carolina's largest sources of drinking water and recreation. And the arguments from the upstream polluters about how they don't drink the water, so they shouldn't have to be financially responsible for stoping their own pollution are pretty lame. They have BENEFITTED financially for many years as they ignored the effects they are having on communities and individuals farther down the river. Let's stop that nonsense! We need an aggressive program to get this problem fixed!
