

# Basin Boundary Changes

In 2009, Division of Water Quality (DWQ) adopted the national Watershed Boundary Dataset which is based on USGS 1:24,000 ridgelines. The Pamlico River Subbasin, hydrologic unit code (HUC) 03020104, now includes all of old DWQ subbasin 03-03-07 and small portions of 03-03-08, 03-01-51, 03-01-53, and 03-02-09, covering ~1,307 square miles. Some exceptions to this dataset were made in the coastal areas for management purposes; the areas previously part of the Roanoke or Pasquotank Basins now included in the Pamlico River Subbasin maintain their classifications.

## Legend

- Transferred Areas in the Tar-Pamlico Basin**
- To Pasquotank
  - To Roanoke
  - To Neuse
  - From Neuse
  - From Roanoke
  - From Pasquotank
  - From White Oak
  - County Boundaries
  - New Basin Boundaries
  - Old Basin Boundaries
  - In Both Old and New Basins
